

VAX IN A MINUTE

February 10th, 2023

February is the Month of Love

Show your love for your community by getting
the COVID-19 bivalent booster today.

As of January 31st, approximately 70% of Washington residents are now eligible to receive the updated COVID-19 bivalent booster.

Most people can receive the bivalent booster two months after getting the primary series or a monovalent booster.

Long term care residents who have not received the bivalent booster have a 30%–50% higher risk for COVID-19 infection.
