## Executive Summary

The Department of Health is required per [RCW 70.170.060](#) to provide annual updates to the public on the status of charity care provided by hospitals in Washington state. Hospitals are required to develop a charity care policy, and to submit financial data regarding charity care to the department. This report summarizes the charity care data provided by Washington hospitals for the hospital fiscal years (FY) ending in 2021.

Hospitals reported a decrease in charity care in FY 2021. Based on a cost-to-charge ratio, Washington hospitals reported actual expenses of \$318.9 million for charity care.<sup>1</sup> These charges reflect a decrease of 15.6 percent from those reported in FY 2020.

---

The amount of money hospitals spent on charity care services in Washington varied widely with the median amount across all hospitals at \$1.96 million; however, the average was more than four and a half times higher at \$9.13 million.

---

For more information on charity care, including detailed reports by hospital, [see the Hospital Patient Information and Charity Care webpage](#).

---

<sup>1</sup> Since the data in this report are based on billed charges, not the actual payment expected by the hospital, the approximate cost of providing charity care can be estimated by applying a cost-to-charge ratio. Multiplying the dollars by the cost-to-charge ratio results in an approximate cost of what hospitals actually spent providing this service to patients. The statewide cost-to-charge ratio is 0.339. Based on the \$940.7 million reported in charity care charges in FY 2021, the overall cost of providing charity care statewide was about \$318.9 million.<sup>2</sup>

# Background on charity care in Washington

## What is charity care?

Charity care is defined in chapter [70.170 RCW](#) as “medically necessary hospital health care rendered to indigent persons when third-party coverage, if any, has been exhausted, to the extent that the persons are unable to pay for the care or to pay deductibles or coinsurance amounts required by a third-party payer, as determined by the department.” Washington law prohibits hospitals from denying patient access to care based on inability to pay or adopting admission policies that significantly reduce charity care.

For the timeframe of this report, patients with family incomes below 100 percent of the federal poverty guidelines receive hospital services at no cost. Hospitals must also provide discounted care to patients between 100 and 200 percent of the poverty guidelines using a sliding scale ([WAC 246-453-040](#)).

In 2022, legislation modified the requirements of hospital-based charity care. For care provided after July 1, 2022, Washington hospitals are placed in one of two tiers and must provide discounts corresponding to each tier. Patients with incomes up to 200 percent of the federal poverty guidelines receive hospital services at no cost and patients between 200 and 400 percent of the poverty guidelines receive care at a discount. The next report, 2022 Charity Care in Washington Hospitals, will reflect these changes.

These are minimum requirements. Hospitals may extend free or discounted care to patients earning more than these levels, and many do. The charity care policies for each Washington hospital are on our [Hospital Policies webpage](#).<sup>2</sup>

## What is the role of the department?

The Charity Care Program (program) at the department is charged with monitoring financial data reporting and enforcing charity care regulations at acute care and psychiatric hospitals. Financial data is received and made publicly available via website posting to increase transparency and public understanding of health care costs. The program reviews hospital charity care policies and practices to ensure hospitals comply with the law. In addition, the program assists hospital staff with understanding and compliance of both financial and charity care requirements and assists patients seeking charity care.

## What are hospitals required to report and when?

Hospitals are required by law to submit charity care policies to the department for review at least 30 days before policies are adopted. Hospitals are also required to submit quarterly and year-end financial reports to the department using a uniform system of accounting. The department uses these financial reports to report charity care data and trends for the state

---

<sup>2</sup> <https://www.doh.wa.gov/DataandStatisticalReports/HealthcareinWashington/HospitalandPatientData/HospitalPolicies>.

each year. Fiscal years vary among hospitals in Washington, with hospital fiscal years ending on March 31, June 30, September 30, or December 31.

Hospitals are required to report total patient services revenue, also called billed charges, and the amount of patient services revenue that is written off as charity care. Hospitals are also required to report bad debt. Bad debt is different from charity care and is defined as uncollectible amounts, excluding contractual adjustments, which arise from failure to pay by patients whose care has not been classified as charity care. All of these data are reported as part of the hospital's year-end financial report.

Hospitals report financial data to the department on an income statement. Below is an abbreviated example of an income statement to illustrate the relationships between the various revenue sources and expenses.

<b>Hospital: Sample Community Hospital</b>	<b>Comment</b>	<b>Sample Hospital Revenue</b>
= TOTAL PATIENT SERVICES REVENUE	Inpatient and outpatient revenue equivalent to Total Billed Charges	615,000,000
- Provisions for Bad Debt	Unpaid charges billed to patient who are not eligible for Charity Care, deducted from total revenue	(15,000,000)
- Contractual Adjustments	Reductions from billed charges negotiated by insurance companies, deducted from total revenue	(350,000,000)
- Charity Care	Unpaid charges billed to patient eligible for charity care, deducted from total revenue	(25,000,000)
=NET PATIENT SERVICE REVENUE	Actual patient revenue received	225,000,000
+ OTHER OPERATING REVENUE	Actual revenue received for office rental, cafeteria income, etc.	10,000,000
= TOTAL OPERATING REVENUE	Actual patient revenue and other operating expenses	235,000,000
-TOTAL OPERATING EXPENSES	Total expense for operating the hospital	(220,000,000)
= NET OPERATING REVENUE	Cash remaining after operation of patient services	15,000,000
+/- NON-OPERATING-NET OF EXPENSES	Nonpatient revenue (investments, partnership fees)	5,000,000
= NET REVENUE BEFORE ITEMS LISTED BELOW	Operating plus nonoperating remainder	20,000,000
+/- EXTRAORDINARY ITEM	One time cash revenue or cash expenses	0
= NET REVENUE OR (EXPENSE)	Net cash remaining after all transactions	20,000,000

## How do hospitals report charity care and how is it calculated?

The amount of charity care reported by hospitals is based on patient services revenue, known as billed charges. These charges are based on the hospital's charge master rate sheet, which sets the price for every treatment and supply category a hospital uses. Every patient's total bill is comprised of the sum of the charge master rates of the various services or supplies used during the stay before any adjustments based on insurance status. All patients, regardless of insurance status, receive the same billed charges for the same services.

The billed charges reflect a markup that varies among hospitals and is higher than the amount the hospital actually expects to be paid. Medicaid and Medicare pay a set rate for services regardless of billed charges, and private insurance companies negotiate with hospitals for large discounts off the master rate sheet.

Charity care is the amount of billed charges an indigent patient incurs for medically necessary hospital health care. Since these charges include the markup, the dollar amount of charity care reported by hospitals overestimates the true cost of providing charity care to indigent patients. To estimate the true cost of providing charity care, the department applies a cost-to-charge ratio. The formula is total operating expenses (the actual cost of running the hospital and providing services) divided by total patient services revenue (billed charges).

Adjusted patient services revenue is the amount of revenue for non-Medicare and non-Medicaid payers, which includes private insurance and self-pay. The proportion of patients covered by Medicare or Medicaid varies widely among hospitals. The use of adjusted patient services revenue allows for a comparison of hospital charity care as a percent of privately sponsored patient revenue.<sup>1</sup>

## 2021 Washington state charity care data

### Statewide charity care charges for hospital fiscal year 2021

This report describes data collected from licensed Washington hospitals for their fiscal years (FY) ending in 2021. FY 2021 includes data for the 12 months prior to the end of each hospital's fiscal calendar, including data for months in 2020 if the fiscal year starts prior to January 1, 2021.

All charity care data for FY 2021 were due to the department by June 30, 2022. Twenty hospitals still have not provided data for their 2021 fiscal year; 84 of 104 hospitals reported charity care information in year-end financial reports. Of the twenty hospitals that did not submit year-end reports, we have provided the annual financial estimates for nineteen hospitals based on their quarterly financial reports or audited financial statements. For one other hospital, no charity care data is available because no FY 2021 financial reports were submitted to the department (Table 1).

**Table 1.** Washington Hospitals That Did Not Submit Year-end Financial Reports, Fiscal Year 2021.

134	Island Hospital	925	Rainier Springs
137	Lincoln Hospital	927	Wellfound Behavioral Health

\* Did not provide either yearend or quarterly financial data

Hospital financial reporting requirements are a result of [RCW 43.70.052](#). [Chapter 246-454 WAC](#) requires submission of both year-end and quarterly financial reports. A hospital is provided one hundred twenty days after the close of its fiscal year to file its year-end report. This time period may be extended up to and including an additional sixty days. Quarterly reports are required to be submitted within forty-five days after each calendar quarter.

The department provides hospitals with the year-end reporting template seven to ten days after the close of each hospital’s fiscal year and deadline reminders, for both year-end and quarterly reports, fourteen days prior to the due dates. Additionally, the department provides education and assistance to hospitals that experience reporting complications, such as staff turnover or system issues that potentially hinder the ability to report in a timely manner.

**Figure 1.** Statewide Hospital Charity Care in Washington, Fiscal Year 2007 - 2021.

Following a decline in charity care after implementation of the Affordable Care Act (ACA) in 2013, charity care increased from 2016 through 2020. The rate decreased again in 2021. As a percent of total hospital patient services revenue, charity care charges dropped from 2.9 percent to 1.2 percent from 2013 to 2021 (Figure 1 and Table 2). This decrease from 2020 to 2021 may be attributed to funding related to the COVID-19 pandemic. In 2021, Washington experienced the second full year of the COVID-19 pandemic and the first fully funded year of the Coronavirus Aid, Relief, and Economic Security (CARES) Act, which provided funding to hospitals for health care-related expenses attributable to the COVID-19 pandemic.

**Table 2.** Statewide Hospital Charity Care in Washington, Fiscal Year 2012-2021

Year	in Millions			Charity Care		Operating Margin %
	Total Patient Services Revenue	Adjusted Patient Services Revenue	Total Charity Care (Billed Charges)	% of Total Revenue	% of Adjusted Revenue	
2012	\$44,728	\$20,775	\$1,285	2.9%	6.2%	5.5%
2013	\$48,482	\$22,795	\$1,422	2.9%	6.2%	5.0%
2014	\$51,993	\$21,288	\$944	1.8%	4.4%	4.6%
2015	\$57,703	\$23,009	\$540	0.9%	2.3%	5.6%
2016	\$61,782	\$24,102	\$568	0.9%	2.4%	2.7%
2017	\$65,506	\$24,734	\$772	1.2%	3.1%	2.0%
2018	\$70,148	\$26,850	\$951	1.4%	3.5%	2.4%
2019	\$76,292	\$28,769	\$1,039	1.4%	3.6%	2.7%
2020	\$74,717	\$28,845	\$1,115	1.5%	3.9%	2.9%
2021	\$81,452	\$30,462	\$941	1.2%	3.1%	2.9%

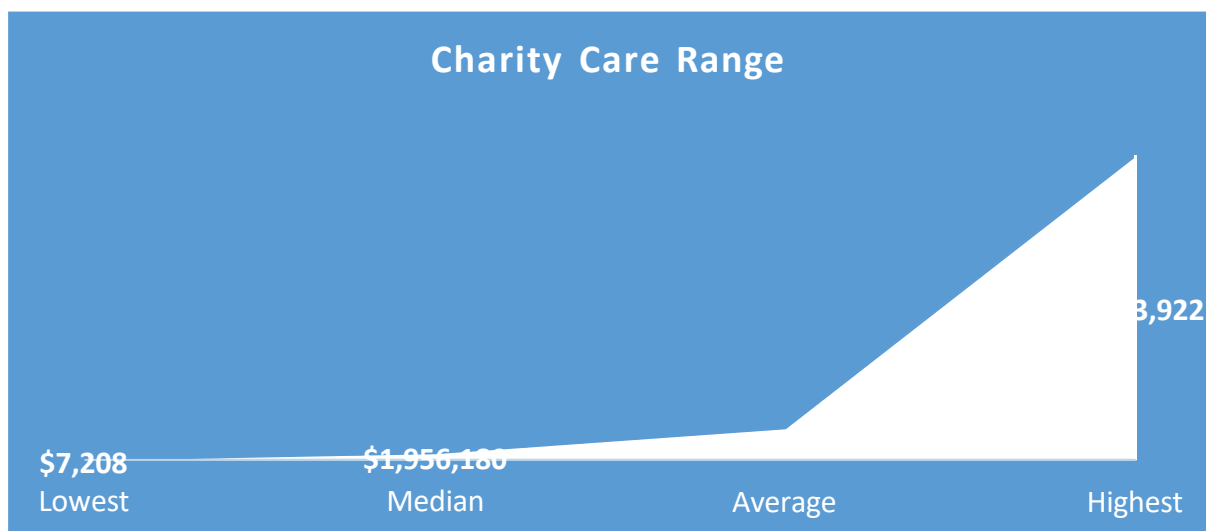

Table 2 notes: Adjusted patient service revenue is the total hospital revenue minus Medicare and Medicaid charges. Operating margin is the total hospital patient service operating revenue (net of deductions) minus total patient service operating expenses expressed as a percent. Note: Patient services revenue is the same as billed charges.

## Distribution of charity care among Washington hospitals

Charity care varied widely among hospitals in fiscal year 2021, ranging from \$7,208 to \$88,173,922. The median amount of charity care per hospital was \$1,956,180; however, the average was much higher at \$9,133,044 as several hospitals provided substantial charity care. The amount varied among hospitals in rural and urban areas and in different geographic areas of the state. These variations do not seem to be explained by population size. Some of the variation may be a function of the proportion of hospital revenue coming from Medicare and Medicaid.

Differences in charity care among hospitals may reflect demographic and socioeconomic differences in service areas, hospital service availability, and charity care practices within the hospital. A high level of reported charity care, for example, may reflect greater need for charity care in the community. Likewise, a low level of charity care may reflect a relative absence of need for charity care in a hospital's service area.

**Figure 2.** Range of Charity Care in Washington, Fiscal Year 2021.

## Adjusting billed charges to determine actual cost of providing charity care

Because billed charges reflect mark-ups that vary between hospitals and are significantly higher than the expected payment, determining the actual cost of providing charity care to eligible patients is challenging. One way to estimate the cost of providing charity care is to use a cost-to-charge ratio.<sup>3</sup> The formula is total operating expenses (the actual cost of running the hospital and providing services) divided by total patient services revenue (billed charges).

<sup>3</sup> <http://medical-dictionary.thefreedictionary.com/hospital+cost-to-charge+ratio>

As an example of how the cost-to-charge ratio works, if a hospital had billed charges of \$1,000,000 and a cost-to-charge ratio of .345, the actual cost for that hospital to treat patients is \$345,000. If that same hospital reported charity care billed charges of \$100,000, the cost of treating those patients is \$34,500. The higher the ratio, the closer the billed charges are to the actual cost of treating patients. This is only an estimate based on overall hospital performance.

Washington hospitals reported \$940.7 million in charity care billed charges in 2021, which amounts to \$318.9 million in actual expenses based on a cost-to-charge formula.<sup>4</sup> Cost-to-charge ratios ranged from .2 to 1.85 with a statewide average of .34. Below are some examples of cost-to-charge ratios for Washington hospitals, including a high, average, and low cost-to-charge ratio.

Hospital	Charity Care Charges	Cost-to-Charge Ratio	Estimated Actual Cost of Charity Care
<b>Garfield County Hospital District</b>	\$85,963	1.47 <sup>5</sup>	\$126,366
<b>Franciscan Health St. Francis Hospital</b>	\$21,711,810	.204	\$4,429,209
<b>PeaceHealth United General Medical Center</b>	\$4,295,153	.397	\$1,705,176

### Contribution of all purchasers of care to hospital charity care

Charity care as a percent of adjusted (non-Medicare, non-Medicaid) revenue increased from 4.4 percent to 6.2 percent from FY 2007 through FY 2013, then declined to 4.4 percent in FY 2014, declined to 2.3 percent in FY 2015, climbing again to 3.1 percent in 2017, 3.5 percent in 2018, 3.6 percent in 2019, and 3.9 percent in 2020. In 2021 charity care as a percent of adjusted revenue was 3.1 percent. Because charity care is unreimbursed, all payers – including insurance companies and patients who self-pay – contribute to covering the cost of charity care provided by the hospital. Throughout this time, fluctuations in the statewide operating margin, which is a

<sup>4</sup> Since the data in this report are based on billed charges, not the actual payment expected by the hospital, the approximate cost of providing charity care can be estimated by applying a cost-to-charge ratio. Multiplying the dollars by the cost-to-charge ratio results in an approximate cost of what hospitals actually spent providing this service to patients. The statewide cost-to-charge ratio is 0.339. Based on the \$940.7 million reported in charity care charges in FY 2021, the overall cost of providing charity care statewide was about \$318.9 million.

<sup>5</sup> Note: The figures in this column are rounded to the third decimal place whereas the Estimated Actual Cost of Charity Care totals in the column to the right are computed by multiplying by the cost-to-charge ratio figure rounded to the eighth decimal place.

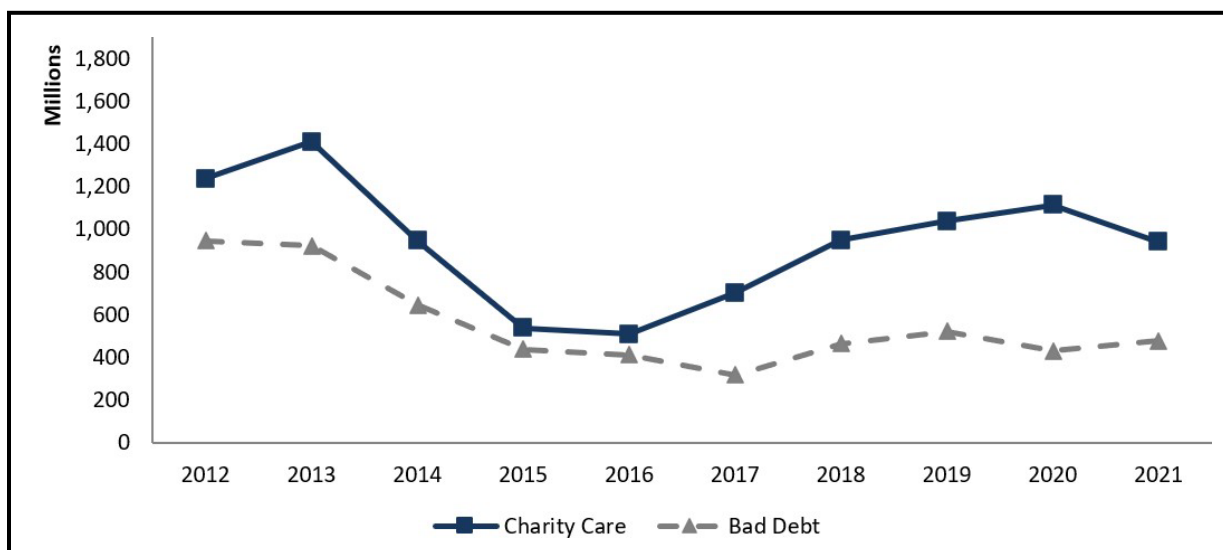

measure of hospital profitability, do not appear to have adversely affected the amount of charity care provided in Washington (Table 2).

## Uncompensated care in Washington

Uncompensated care includes both charity care and bad debt. Looking at uncompensated care gives us a bigger picture of the impact of the ACA and a way to compare Washington to other states.

Prior to the implementation of the ACA, both charity care and bad debt had been increasing. Both began to decline in 2013 with implementation of ACA provisions and this continued until 2017, when charity care began to rise again. In 2021, charity care decreased while bad debt increased slightly (Figure 3).

**Figure 3.** Hospital Charity Care and Bad Debt Patient Service Charges in Washington, Fiscal Year 2012 – 2021

## Summary

In 2013, as a result of the ACA, Washington saw the first decline in the amount of charity care reported by hospitals since the department began gathering these data in 1989. That decline, ceased in 2016 and increased steadily until 2020 where Washington saw charity care charges peak at \$1,114,536,409. From 2020 to 2021, Washington charity care again experienced a decline that may be attributed to the full year of economic relief hospitals received from the Coronavirus Aid, Relief, and Economic Security (CARES) Act.

## About this report

The department has issued an annual report since 1990 as directed by chapter 70.170 of the Revised Code of Washington (RCW). Your feedback is important to us. Submit your comments by email at [charitycare@doh.wa.gov](mailto:charitycare@doh.wa.gov) to help us continue to improve the charity care report.
