

HPV Vaccine Forecast

On January 20, 2023, the Washington Immunization Information System will accommodate the recommendation for the administration of the Human Papillomavirus (HPV) vaccine series starting at age 9.

The Certificate of Immunization Status (CIS) will show HPV vaccines as **'Recommended Vaccines (Not Required)'** for patients ages 9 and older. For more information regarding the Certificate of Immunization (CIS) click [here](#).

For guidance on adding, editing or deleting immunization records in the WAIS, click [here](#). For instructions on printing patient vaccination records click [here](#).

The vaccination forecast for patients ages 9 and older will include the HPV series. Click [here](#) for additional information on viewing a patient's vaccination summary and forecast.
